

Queen Palms
Small 7' or smaller**

Hose End Sprayer: 1-2 minutes of fertilizer application per palm apply around the Root Zone. Do not follow up with a soaking afterwards. Apply once every 30 days

Manual Application: Mix Ratio is (1) 8oz cup of Liquid Fertilizer to (1) 5 gallon bucket of water. Pour evenly around the Root Zone at the base of the palm. Do not follow up with a soaking afterwards. Apply once every 30 days.

Medium to Large**

Hose End Sprayer: 2-5 minutes of fertilizer application per palm apply around the Root Zone. Do not follow up with a soaking afterwards. Apply once every 30 days

Manual Application: Mix Ratio is (1) 8oz cup of Liquid Fertilizer to (1) 5 gallon bucket of water. Pour evenly around the Root Zone at the base of the palm. Do not follow up with a soaking afterwards. Apply once every 30 days.

***Highly Recommend to apply Superfeed's Crown Treatment once every 90 days. Apply by pouring directly into the heart of the Queen Palm. The fertilizer may drain down the trunk of the Palm, if so spray off any access drainage on the trunk. If left unsprayed the fertilizer may cause staining.*

Grass & Turf

Hose End Sprayer: 1 Quart feeds up to 600 square feet of grass or turf. Apply evenly over the surface area and follow up with a 20-30 minute evenly applied deep soaking. Apply every 15-30 days
